Lash & brow aftercare

What to do and what to avoid after your appointment

Lash extensions

- **Keep lashes dry** for the first 24–48 hours, as your stylist advises. After your first wash time, cleanse with lash cleanser, rinse and pat dry. Brush through with a clean spoolie once dry.
- **Avoid** steam, saunas, sunbeds and strong direct sun while the adhesive sets. Skip waterproof mascara and resist picking or pulling at your extensions.

Brow waxing & tinting

- **After a wax,** let the skin settle. Keep make-up, scrubs and exfoliating acids off freshly waxed skin while it feels tender. Avoid heat and strong sun during the period your stylist advises.
- **After a tint,** let the colour soften naturally. Avoid rubbing or scrubbing your brows, even if the shade looks darker at first.

Brow lamination

- **Keep brows dry** until your first wash time. Avoid steam and pressing your brows against a pillow while the hairs set.
- **Once the brows have set,** brush them into shape each morning with a clean spoolie. Use the conditioner your stylist recommends.
